```
  pause        Pause all processes within one or more containers
  port         List port mappings or a specific mapping for the container
  ps           List containers
  pull         Pull an image or a repository from a registry
  push         Push an image or a repository to a registry
  rename       Rename a container
  restart      Restart one or more containers
  rm           Remove one or more containers
  rmi          Remove one or more images
  run          Run a command in a new container
  save         Save one or more images to a tar archive (streamed to STDOUT by default)
  search       Search the Docker Hub for images
  start        Start one or more stopped containers
  stats        Display a live stream of container(s) resource usage statistics
  stop         Stop one or more running containers
  tag          Create a tag TARGET_IMAGE that refers to SOURCE_IMAGE
  top          Display the running processes of a container
  unpause      Unpause all processes within one or more containers
  update       Update configuration of one or more containers
  version      Show the Docker version information
  wait         Block until one or more containers stop, then print their exit codes

Run 'docker COMMAND --help' for more information on a command.
